WHY VEDIC?

Vedic Mathematics is helpful in many ways like

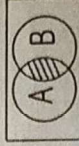

1. Improving speed and efficiency to solve even the most complex math problems
2. Helps in developing a flexible bent of mind with reduction in memorizing concepts and more practical applications
3. Increases concentration and retention, also improves their confidence levels
4. Helps strengthen their logical reasoning skills
5. Lays a foundation that will help them understand concepts easily even when studying advanced levels or preparing for competitive exams in the future

Krishnagar Government
College

$$\Sigma f(a+b)=c \quad x\sqrt{c+25}=$$

$$y=\begin{cases} x+3y+2c=1 \\ 2x+6y+5z=38 \\ x+2y+10z=2 \end{cases}$$

VEDIC

MATHEMATICS

Have fun and find sums less scary!

An Add-on Course Offered by

Department of Mathematics

Existing Method	Vedic Mathematics Method
$18 \times 18 = ?$	Number = 18
18×18	Base = 10
18	Excess = $18 - 10 = 8$
	First part = $18 + 8 = 26$
	Second Part = $8 \times 8 = 64$
14^4	Ans:- $26 + 64$
18	
324	324
